

Recycling Update

APRIL

STATISTICS
X tonnes of recovered materials recycled into new products

[actual figures to be entered when available]

WELL DONE!
This is a total NETT improvement of X tonnes of resources recovered since March 2010.

[actual figures to be entered when available]

DID YOU KNOW?

The raw material bauxite is mined to manufacture aluminum?

Recycling aluminum requires 75% less energy than making it from raw materials.

RECYCLING TIP

Empty aerosol cans from hair spray, fly spray, deodorants etc can all be placed in the recycling bin to recover the aluminum and steel for recycling into new cans.

BULK WASTE COLLECTION

Great Lakes Council
8th-19th February

Greater Taree City Council
7th June to 2nd July

Gloucester Shire Council
No bulk waste collection available

If you missed these dates and still have bulky waste please see your Council's website for landfill facilities, fees and charges.

NEXT MONTH!

See how much material you recycle next month and learn how steel is recycled.
